PRODUCT REQUIREMENTS DOCUMENT (PRD)

1. Product Title

Mall & Online Offers Aggregator Mobile Application

---

2. Product Overview

The Mall & Online Offers Aggregator App is a centralized mobile platform that integrates:

- Offline mall store offers (manually updated by shop owners)
- Online platform offers (auto-synced via API integration)

The application enables users to:

- View and compare offers
- Add products to cart
- Make secure payments
- Receive real-time notifications

---

3. Problem Statement

Customers currently need to:

- Visit multiple apps/websites to check offers
- Physically visit stores without knowing discounts
- Manually compare prices

Offline stores lack:

- Digital visibility
- Direct communication channel with customers

---

4. Target Users

Primary Users

- Mall customers
- Online shoppers

- Students & families

Secondary Users

- Offline shop owners
- Mall management
- Online sellers

---

5. Objectives

- Provide a single unified offers platform
- Increase offline store visibility
- Enable secure in-app purchases
- Provide real-time updates
- Improve customer engagement

---

6. Core Features

Customer Features

- User registration/login
- Browse & filter offers
- Search functionality
- Price comparison
- Add to cart
- Secure payment gateway
- Order tracking
- Wishlist
- Push notifications

Store Owner Features

- Store registration

- Add/edit/delete offers
- Set offer expiry date
- View sales analytics
- Manage inventory

Admin Features

- Approve stores
- Monitor transactions
- Manage users
- Remove inappropriate content

---

7. Technical Stack

Layer	Technology
Frontend	React Native (Expo)
Backend	Java Spring Boot
Database	MongoDB
Real-time	Socket.io
Hosting	Firebase / AWS
Payment	Razorpay / Stripe

---

8. Revenue Model

- Commission per transaction (2–10%)
- Store subscription plans
- Featured promotions
- Sponsored advertisements

---

9. Success Metrics

- Number of active users
- Monthly transactions
- Store onboarding rate
- Revenue growth

---

10. Future Enhancements

- AI-based personalized offers
- Location-based notifications
- Loyalty rewards system
- Multi-city expansion
